Things to know before waxing. When you make an appointment for a body waxing service, please make sure you have an inch of growth or generally speaking 2-3 weeks of growth by the date of the appointment. This will ensure a successful service.

One or two days before the scheduled appointment, you should exfoliate the area that is to be waxed. The day of the appointment you should avoid using a moisturizer. Be sure not to tan 24-48 hours before waxing-as it increases sensitivity.

If you are using Accutane, Retin-A, Differin, Renova, blood thinners, Alpha hydroxy products or have high anti-biotic use, you may not be a good candidate for a waxing service. Certain physical conditions such as diabetes, pregnancy and a pre-disposition to cold sores may also cause heightened sensitivity to the skin.

When Bikini Waxing, please trim area that is to be waxed if it is longer than one inch. This will ensure a more comfortable service.
